Thin Film Transistors 16 (TFT 16)

Open all abstracts

Chapter 1: Device Modeling, Physics, and Reliability

(Invited) Improved Thin Film Transistor Model Predicts TFT 3
Operation in the THz Range

Michael Shur, Xueqing Liu and Trond Ytterdal

+ Open abstract  View article  PDF

(Invited) Achieving Lower Power Logic Using P-Type Metal 13
Oxide Thin Film Transistors

Niels C A van Fraassen, Sanggil Han, Kham Niang and Andrew J. John Flewitt

+ Open abstract  View article  PDF

(Invited, Digital Presentation) Oxide TFTs Based on 19
Semiconductors and Semimetals

Jiawei Zhang, Josh Wilson and Aimin Song

[+ Open abstract](#)

[View article](#)

[PDF](#)

Intrinsic Channel Mobility Associated with Extended State Transport in IGZO TFTs 25

Muhammad Salahuddin Kabir, Eli Powell, Robert G. Manley and Karl D. Hirschman

[+ Open abstract](#)

[View article](#)

[PDF](#)

(Digital Presentation) Degradation and Recovery of Low Temperature Poly-Si Thin Film Transistors Under DC and AC Bias Stresses 33

Han-Wen Liu, Shu-Wei Syu and Bo-Xiang Huang

[+ Open abstract](#)

[View article](#)

[PDF](#)

(Digital Presentation) Instability of α -Si:H TFTs under Simultaneous Ultraviolet Light Illumination and Different Bias Stresses 45

Han-Wen Liu, Tzu-Cheng Hung and Bo-Xiang Huang

[+ Open abstract](#)

[View article](#)

[PDF](#)

Chapter 2: Processes

(Invited, Digital Presentation) Evaluation of Polycrystalline-Si_{1-x}Ge_x Thin-Film Transistors Grown Laterally on a Glass Substrate Using a Continuous-Wave Laser 59

Akito Hara, Tatsuya Sagawa, Kotaro Kusunoki and Kuninori Kitahara

[+ Open abstract](#)[View article](#)[PDF](#)

(Invited, Digital Presentation) Ion Implantation for Amorphous-InGaZnO Sheet Resistance Control Technique 67

Toshimasa Ui, Keisuke Yasuta, Yuya Yamane and Junichi Tatemichi

[+ Open abstract](#)[View article](#)[PDF](#)

Process Development of Amorphous Indium Tin Gallium Oxide (ITGO) Thin Film Transistors 79

Eli Powell, Muhammad Salahuddin Kabir, Bin Zhu, Robert G. Manley and Karl D. Hirschman

[+ Open abstract](#)[View article](#)[PDF](#)

Chapter 3: Solution Processes

(Invited) High Performance Fully Solution Processed Transistors Towards Flexible Sustainable Electronics 89

Juan Paolo Bermundo, Dianne Corsino, Umu Hanifah and Yukiharu Uraoka

[+ Open abstract](#)[View article](#)[PDF](#)

Performance Enhancement of Solution-Processed $\text{Si}_x\text{Sn}_y\text{O}$ TFTs using Solution Combustion Synthesis 95

Candell Grace Paredes Quino, Juan Paolo Bermundo, Mutsunori Uenuma and Yukiharu Uraoka

[+ Open abstract](#)[View article](#)[PDF](#)

Electrical Performance Enhancement of Fully Solution-processed Amorphous In-Zn-O Thin-Film Transistor via Argon Plasma Treatment

99

Umu Hanifah, Juan Paolo Bermundo, Mutsunori Uenuma and Yukiharu Uraoka

[+ Open abstract](#)[View article](#)[PDF](#)

Chapter 4: Organic TFTs

The Effect of a Copolymer Interfacial Layer on the Performance of Organic Thin-Film Transistors

105

Eyob Negussie Tarekegn, Mastooreh Seyedi, Igor Luzinov and William R. Harrell

[+ Open abstract](#)[View article](#)[PDF](#)

(Digital Presentation) Effect of Active Layer Thickness on Organic Thin-Film Transistors

115

Vijai M Moorthy and Viranjay Mohan Srivastava

[+ Open abstract](#)[View article](#)[PDF](#)

Chapter 5: Applications

(Invited) Progressive Involvement of Thin Film Technologies in Connected Objects to Meet New Societal Challenges

125

Olivier Bonnaud

[+ Open abstract](#)[View article](#)[PDF](#)

(Invited) Oxide TFT Applications: Principles and Challenges

Yue Kuo

137

[+ Open abstract](#)[View article](#)[PDF](#)

(Invited, Digital Presentation) Heterogeneous IGZO/Si
CFET Monolithic 3D Integration

145

Yao-Jen Lee, Shu-Wei Chang, Wen-Hsi Lee and Yeong-Her Wang

[+ Open abstract](#)[View article](#)[PDF](#)
