TABLE OF CONTENTS

PREFACE                                                              iii

Amorphous and Microcrystalline Silicon TFTs

Large TFT-LCD Manufacturing Technology*                              1
  C.-H. Oh, H.-C. Choi, and C. H. Hong

a-Si:H TFT Circuit Integration on Glass and Plastic Substrates*       7
  A. Nathan, P. Servati, K. S. Karim, D. Striakhilev, and A. Sazonov

Effect of Mechanical and Electrical Stress on the Performance of an a-Si:H TFT on Plastic Substrate
  S. H. Won, C. B. Lee, H. C. Nam, J. H. Hur, and J. Jang

Gate Dielectrics for Thin Film Transistor of Nanocrystalline Silicon Deposited at 150°C
  I-C. Cheng and S. Wagner

Polycrystalline Silicon TFTs

A Novel Self-Aligned Ultra-Thin Elevated Channel Low Temperature CMOS Poly-Si TFT
  Z. Xiong, H. Liu, C. Zhu, and J. K. O. Sin

Development of Poly-Si CMOS TFT Using Counter Doping Process          47
  J. Y. Yang, S. H. Yu, J. I. Kim, and M. S. Yang

Polysilicon CMOS TFTs Inverters with a Gate Silicon Oxide Deposited using PECVD with Hexamethyldisiloxane (HMDSO)
  G. Gautier, N. Coulon, C. E. Viana, S. Crand, R. Rogel, A. Goulet, N. I. Morimoto, and O. Bonnaud

Location-Control of Large Grains by µ-Czochralski (Grain Filter) Process and Its Application to Single Crystalline Si Thin Film Transistors*
  R. Ishihara, P. Ch. van der wilt, B. D. van Dijk, J. W. Metselaar and C. I. M. Beenakker

*Invited Paper
Dynamic Characteristics of Single Grain Silicon TFTs
F. Yan, P. Migliorato, N. Bavidge, and R. Ishihara

Microscopic beam profile and its relationship with the poly-Si film morphology grown laterally by a phase-modulated excimer-laser crystallization method
Y. Kimura, M. Jyumonji, M. Hiramatsu, M. Nishitani, and M. Matsumura

High Performance Poly-Si TFTs on Non-Alkali Glass Produced Using Continuous Wave Laser Lateral Crystallization*

Device and Process Technology Requirements for Next-Generation, Ultra-High-Performance Poly-Si TFTs*
A. T. Voutsas

Crystallization, Etching, Deposition, Hydrogenation, and Metallization

Polysilicon TFTs Made by Using Different Crystallization Techniques*
T. Mohammed-Brahim, O. Bonnaud, and Y. Helen

Ni Silicide Mediated Crystallization of Amorphous Silicon Thin Film on Glass at 360°C
S. J. Park, K. H. Kim, W. S. Sohn, J. H. Choi, and J. Jang

Low Temperature Polycrystalline Silicon Thin Film Transistors Fabricated by Electroless Plating Ni Induced Crystallization of Amorphous Si
C.-W. Chao, Y.C. Sermon Wu, Y.-C. Chen, G.-R. Hu, and M.-S. Feng

The Effects of Oxygen Concentration in Ni Film on the Metal Induced Crystallization of a-Si:H
Y.-D. Lin, Y.C. Sermon Wu, C.-W. Chao, and G.-R. Hu

Effect of Native Oxide Layer on Metal-Induced Crystallization of a-Si:H
M. Barghouti, H. Abu-Safe, H. Naseem, and W. D. Brown

The Effects of Pd2Si on the Electroless Plating Pd Induced Crystallization of Amorphous Silicon Thin Films
C. T. J. Huang, G.-R. Hu, Y.C. Sermon Wu, and C.-W. Chao

High Quality TEOS Silicon Oxide Deposited at Low Temperature for TFT Gate Dielectric Application*
N. I. Morimoto, C. E. Viana, A. N. R. da Silva

*Invited Paper
Low-Temperature-Proceeded Gate Insulator for Poly-Si TFTs by Combination of Photo-Oxidation and PECVD  
Y. Nakata, T. Okamoto, M. Goto, and K. Azuma

Electrical Properties of Room Temperature SiO_2 Deposited by a Combination of Jet Vapor and Multipolar Electron Cyclotron Resonance Plasma  
G. Isai, A. Kovalgin, J. Holleman, P. Woerlee, and H. Wallinga

Effects of Plasma Treatments on the Characteristics of Poly-Si Thin-Film Transistors Having Electrical Junctions Induced by a Bottom Sub-Gate  
C.-M. Yu, H.-C. Lin, T.-F. Lei, and T.-Y. Huang

Schottky Barrier Poly-Si Thin-Film Transistors with Nano-scale Channel Width  

On Gas-Phase Depletion During LPCVD of GeSi Films using GeH_4/SiH_4 and GeH_4/Si_2H_6 Gas Sources  
A. Kovalgin and J. Holleman

Reactive Ion Etching and Via Opening in Low Permittivity Inter-level Dielectric Films for Pixelated TFT Arrays  
R. Jeyakumar, K. S. Karim, S. Sivoththaman, and A. Nathan

Characteristics of Schottky Barrier Poly-Si Thin-Film Transistors with Excimer Laser Annealing Treatment  
K.-L. Yeh, H.-C. Lin, R.-W. Tsai, M.-H. Lee, and T.-Y. Huang

Devices, Modeling, and Characterization

Simulation and Modeling of Nanocrystallization Silicon Thin Film Transistors*  
B. Íñiguez, D. Dosev, J. Pallarès, L. F. Marsal, and T. Ytterdal

Conduction and Low-Frequency Noise: Diagnostic Tools for Low-Temperature (<600°C) Polysilicon Thin Film Transistor Technology*  
L. Pichon, A. Mercha, O. Bonnaud, and R. Carin

New, Novel Applications and Materials

A Highly Stress-Resistant and High-Performance Poly-Si TFT for System-in Displays*  
T. Shiba, M. Hatano, M. Matsumura, Y. Toyota, Y. Tai, M. Ohkura, T. Miyazawa, and T. Itoga

*Invited Paper
Amorphous Silicon Thin-Film Transistor for Active-Matrix Field Emission Display*  
Y.-H. Song

Polysilicon TFT Magnet Sensors*  
F. Le Bihan, E. Carvou, and O. Bonnaud

Pentacene-Based Field Effect Transistors*  

Boron-doped a-Si:H Thin Film Deposition Process and Applications in p-channel Thin Film Transistor and Photodiode for He-Ne Laser Light Detection  
Y. Kuo, H. Nominanda, M. Ristova, H. H. Lee, and J.-Y. Tewg
